BE Safety Screens Side Panel

100% sustainable safety

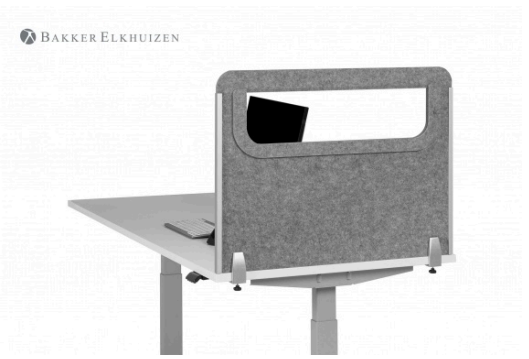

Do you remember what the office garden looked like before COVID19?

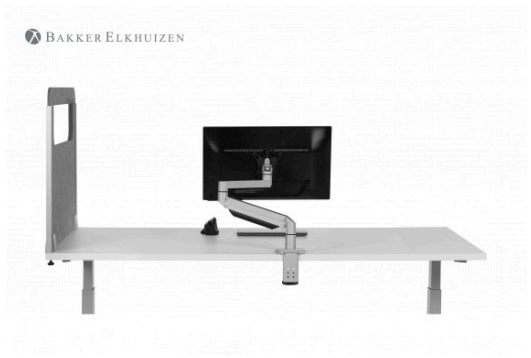

As you know, for the time being, we're not returning to that situation. We all need to create a new working environment that is safe and healthy.

The plastic soup is a common and major problem. We therefore believe that it is our respondibility to make a contribution and tackle the plastic waste problem. BakkerElkhuizen does this by using as little plastic as possible and by recycling PET bottles and making them into new products.

PET bottles and acrylic are extremely suitable for reuse. A fair amount of PET bottles in circulation are returned and reused. Unfortunately a stagering amount end up as waste and in some cases dumped in to our oceans.

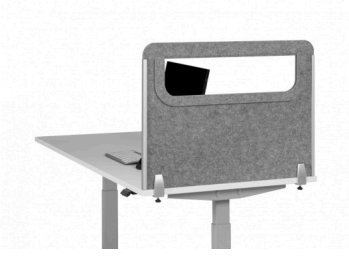

BE Safety Screens, for healthy and safe working

We offer a solution in which you achieve this in a beautiful, clean, affordable, sustainable and circular way. With the BE Safety Screens Side Panels you create this healthy workplace. The Side Panels are made of 100% PET felt (recycled plastic bottles). You can also choose to equip the Side Panels with acrylic windows. These are removable and therefore easy to clean.

The advantages at a glance

Safety first
With the BE Safety Screens you create a safe and healthy working environment in every office.

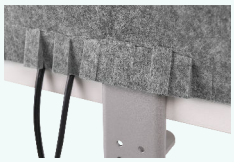

Improved privacy
Because PET felt is a solid material, users have more privacy. If desired, screens are also available with transparent, acrylic windows for increased interaction with colleagues.

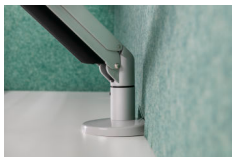

Absorbing noise
PET felt shows excellent acoustic performance.Today, it is often used as an acoustic material to reduce noise levels and improve concentration

Cable management
The BE Safety Screens include a brush-opening at the bottom of the back so that you can easily organise of all your cables and accommodate a monitor arm.

Easy installation
The BE Safety Screens are easy to unfold and place on thedesk. With easy to use clamps these panels stay neatly in place.

Easy to clean
Contrary to most expectations, PET Felt is highly resistant to chemicals and can be easily cleaned with water or alcohol based products, just like acrylic. Water or quality detergent cannot damage PET Felt or acrylic. If a stain remains, it is advised to dab it with a dry cloth while the PET Felt is still wet. Do not rub!

Knowledge Center

Worldwide we speak of the era before and after the coronavirus. Experts agree that we are facing a big change, at least in the short term and maybe beyond.
